APPENDIX F.3 TO IMS DOCUMENTATION

Information Security Policy

We, the senior management of Tranelux International S.a.r.l. EUROMOVERS, declare that the company's management assumes full responsibility for the company's information security.

We undertake to actively support our established "Information Security" staff function and security processes. Our company will refer to ISO 27001 and implement the requirements of this standard. To this end, management will conduct regular internal audits, with appropriate management of documentation and records, management review and continual improvement of the system using the PDCA model.

Our primary objective is to maintain the trust of our customers and other interested parties in our organisation. We will achieve this objective by identifying and implementing appropriate measures within our company to:

- comply with legal provisions (data protection law);
- protect our business secrets;
- preserve the confidentiality of our customers' data;
- complete projects and provide services within the allotted time; and
- reliably fulfil agreed customer requirements.

These and other objectives and measures are defined and determined in accordance with the C.I.A. principles of confidentiality, integrity and availability of information.

Targeted processes and procedures are established to take account of all areas of our service provision, in their full scope and impact.

These processes and procedures enable us to establish, maintain and document our detailed and overall objectives.

Requirements, risks and objectives, the importance of security, fundamental rules and obligations are governed by our INFORMATION SECURITY DIRECTIVE (VA#1), which is communicated to all employees of our organisation and may be made available externally upon request to management.

At the discretion of senior management, this information security policy may be made accessible to the public or other interested parties.

Contern, 13/10/2026
